+49 176 76596252 @ farhan.anik@gmail.com in farhanrahmananik farhanrahmananik MdFarhanRahman_Anik farhanrahmananik.github.io/sysadmin Cottbus, Germany

RHCSA and RHCE certified systems engineer with enterprise experience across **Windows Server** and **Red Hat Enterprise Linux**. Production background in **Active Directory**, **Exchange Server**, **Hyper-V** failover clustering and **SQL Server** clusters, combined with **L2/L3** incident handling and root-cause analysis for corporate clients. Currently completing an **M.Sc. in Cyber Security** in Germany, alongside self-built, publicly documented labs in Active Directory administration, **Ansible** infrastructure automation, and **Python** tooling for email header and phishing analysis. Seeking a role in system, cloud or **M365 administration**, identity management, or security operations.

WORK EXPERIENCE

March 2022
December 2022

Technology Specialist

Tech One Global Ltd, Dhaka, Bangladesh

Enterprise IT solutions provider and **Microsoft Gold Partner** in Bangladesh, delivering infrastructure, productivity and cloud solutions to corporate customers.

- Implemented and maintained enterprise services including **Active Directory**, **Exchange Server**, **DNS**, **DHCP**, file and storage services, and **Hyper-V** failover clusters.
- Supported and optimised **SQL Server** clusters to improve reliability and performance for business-critical applications.
- Provided **L2/L3** technical support, root-cause analysis, incident resolution and troubleshooting for enterprise infrastructure issues.
- Prepared proof-of-concept environments and technical demonstrations aligned with customer requirements and solution stacks.
- Created technical documentation and supported production IT environments covering servers, databases, deployment, reliability and system operations.

Technical Support Executive & Instructor

Linux Pathshala Ltd, Dhaka, Bangladesh

Training and services company focused on Linux, networking and enterprise open-source technologies.

- Installed, configured and maintained **Red Hat Enterprise Linux** systems including users, permissions, storage, services, networking and security hardening.
- Managed web hosting, **DNS**, domains, **FTP/SFTP**, **Apache**, **Nginx** and mail server tasks in Linux-based environments.
- Diagnosed and resolved hardware, software, server-side and network issues for students and corporate clients across mixed **Linux/Windows** estates.
- Delivered instructor-led training on **RHCSA** and **RHCE**, guiding students through hands-on labs and exam-focused practice.
- Created practical lab scenarios covering **SELinux**, firewalls, web services, file services, **SSH** and shell scripting.

Web Developer

CREbsol Ltd, Dhaka, Bangladesh

Software and web development company delivering custom web applications for local and international clients.

- Managed hosting environments end to end – **cPanel**, domains, **DNS**, email accounts, **FTP/SFTP** and website deployment.
- Designed and managed **MySQL** databases including schema design, queries, indexing, backups and data maintenance.
- Developed and maintained **PHP/MySQL** web applications and WordPress sites to client and business requirements.

EDUCATION

Ongoing
Oct 2023

M.Sc. in Cyber Security

Brandenburg University of Technology Cottbus-Senftenberg, Germany

INFRASTRUCTURE & SECURITY PROJECTS

- Windows Server Active Directory Administration Lab

[Repository](#) | [Case study](#)

Built a Hyper-V domain environment with **AD DS** and AD-integrated **DNS**, a domain-joined Windows 11 client, and a custom OU hierarchy for users, groups, computers and service accounts. Applied a dedicated **Group Policy** security baseline alongside domain password and lockout policy, and enforced group-based least-privilege access through **SMB** and **NTFS** permissions, validated across a nine-point department access matrix. Configured security auditing and traced logon, lockout and restoration events, and wrote a reusable read-only **PowerShell** validation script. Documented with sanitised, public-safe evidence.

Group Policy

PowerShell

SMB/NTFS

Hyper-V
- Linux Infrastructure Automation Lab

[Repository](#) | [Case study](#)

Automated a three-node Ubuntu Server environment from a single **Ansible** control node using eight playbooks covering user and package management, a restrictive **UFW** firewall baseline, **SSH hardening** (root and password login disabled), **Nginx** deployment, scheduled configuration backups and maintenance timers via **systemd**. All playbooks passed syntax validation and configuration playbooks passed idempotency checks; backup archive integrity and zero failed systemd units were verified across all nodes.

Hyper-V
- Email Header Analyzer

[Repository](#) | [Case study](#)

Wrote a zero-dependency **Python** CLI tool that reads an **.em1** file and returns a single JSON verdict : parsed headers and Received chain, reported **SPF/DKIM/DMARC** results, From/Return-Path/DKIM domain alignment, URL hostname mismatches between anchor text and target, and attachment metadata with **SHA-256** hashes. Scoring uses 46 explainable weighted rules with grouped correlated signals. Calibrated against seven real messages; the measured outcome, including two documented false negatives, was published rather than tuned away.

SKILLS

Windows & Directory Services	Windows Server 2016/2019, Active Directory Domain Services, Group Policy, Exchange Server, DNS, DHCP, File & Storage Services, Hyper-V, Failover Clustering, SQL Server, PowerShell
Linux & Open Source Infrastructure	Red Hat Enterprise Linux, CentOS, Ubuntu Server, Fedora, SELinux, FirewallD, UFW, LVM, Kickstart, OpenLDAP, Apache, Nginx, Samba, Postfix, Dovecot, systemd, Bash & Shell Scripting
Security	Incident Handling, Log & Packet Analysis (Wireshark), Network Security, Web Application Security (OWASP), Vulnerability Assessment (DAST/SAST), Nmap, Burp Suite, Semgrep, Authentication & Encryption Concepts, System Hardening
Networking	Routing & Switching, VLANs, Subnetting, Cisco Fundamentals (CCNA), HTTP/HTTPS, SSH, SMB, SMTP, FTP/SFTP
Automation & Configuration Management	Ansible (playbooks, inventories, idempotent configuration), systemd timers, Scheduled Backups, PowerShell Scripting, Bash
Cloud & Virtualisation	AWS (EC2, S3, RDS, VPC, Route 53, IAM), Hyper-V, VMware, VirtualBox, Docker, Infrastructure Provisioning, Cloud Security Fundamentals
Databases	MySQL, PostgreSQL, Oracle Database 12c, SQL, Schema Design, Backup & Restore, Indexing
Programming & Automation	Python, Bash, PowerShell, SQL, C, C++, PHP, JavaScript, Git

ADDITIONAL EXPERIENCE

Oct 2024 – Jun 2026 Part-time and working-student roles in Germany (logistics, delivery and service operations) alongside full-time M.Sc. studies – Flink Expansion 4 GmbH, Takeaway Express (Lieferando), burgerme Cottbus.
